KITS FOR EVERY STYLE PRO.

# 2026

OUR BOLD DESIGN SETTING  
A NEW BENCHMARK FOR  
GROOMING TOOLS

# OUR BRAND STORY

Born in Ontario, Canada, BPX emerged to solve a long-standing challenge in the grooming industry: professionals were forced to choose between tools that were affordable but unreliable, or premium instruments that lacked accessibility and modern innovation.

The market needed precision without compromise. BPX was created to fill that gap.

With a fully integrated design studio and dedicated manufacturing in-house, BPX delivers rapid innovation and tools engineered with purpose. Our team brings decades of mastery across Design, Luxury Packaging, and Professional Grooming. Together, we shape tools that work for the artist behind them, supporting barbers, stylists, aestheticians, groomers, and spa experts who demand excellence from themselves and the instruments they rely on.

# OUR VISION

To empower grooming and beauty professionals worldwide with innovative, stylish, and accessible tools that elevate skill, confidence, and creativity.

# OUR MISSION

To design and engineer high-performance grooming instruments with precision, intention, and continuous innovation. Each BPX range is crafted to meet the evolving needs of professionals, reinforcing their technique, enhancing their workflow, and supporting their pursuit of mastery.

# OUR SLOGAN

"BPX crafts quality tools with passion for All"

## BPX Product Evolution Timeline

### 2023—Foundation

Setting the Standard for Accessible, Purpose-Driven Tools. BPX began its journey by establishing a foundation of accessible grooming kits engineered for efficiency and ease of use. From compact Travel Kits to the original Master Kit, the focus was clear: equip emerging talent and grooming enthusiasts with reliable instruments that elevate their craft from day one.

This debut collection set the stage for BPX's commitment to quality, ergonomics, and user-focused design.

### 2024—Professionalization

Responding to the needs of trained experts, BPX introduced the Professional Groomer's Series at Hairfest 2024.

Crafted in Japanese SUS420 stainless steel, this range delivered durability, sharpness, and balanced performance suited for salon and studio environments. Left-handed options and compact models made professional precision accessible to more artists, reinforcing BPX as a brand for working professionals.

### 2025—Expansion and Refinement

With the growth of Aesthetics and Spa services, BPX expanded into premium foot-care tools and introduced a refined Aesthetics Kit for advanced users. The upgraded Barber's Master Kit 2.0, revealed at CIBEX 2024, delivered improved ergonomics and cutting performance for the modern grooming roster.

At Hairfest Level III 2025, BPX launched the Pro 200 Series: high-grade Japanese SUS420 scissors and thinning shears engineered for precision longevity, supported with professional care tools. The year closed with the debut of artistic sculpting razors and wooden handle razor variants, signaling BPX's commitment to creative versatility.

### 2026—A New Era of Innovation

This Year marks a defining milestone for BPX with the introduction of the Swivel Series. Engineered for fluid motion cutting and advanced modern hairstyling techniques, the Swivel Series supports everything from structural cutting to dynamic texturizing. This collection was designed to enhance control, reduce wrist and shoulder strain, and help professionals achieve greater artistic refinement.

BPX will also unveil its redesigned digital platform, featuring a complete SKU library, improved navigation, and new educational content integrated across social channels.

Further expansions across both Hairdressing and Aesthetics Ranges strengthen BPX's role as a leader in ergonomic, performance driven grooming solutions.

As techniques evolve and expectations rise, BPX will remain at the forefront, designing instruments that meet the demands of the future while empowering every artist to elevate their craft.
